CONSTRUCTION DETAILS

- Install 6' x 30' loop detector encased in 1/4" flexible tubing quadrupole type (3-6-3).
- Install 1" liquid tight flexible non-metallic conduit for detector sleeve.
- Use existing handhole and conduit.
- Use existing base mounted cabinet.

GENERAL NOTES:

- "D.O." indicates a delay-output loop detector.
- The Right-of-way line along MD 144 is at the back edge of the sidewalk.
- All underground and overhead utilities shown on these plans are schematic only and may not be complete. The contractor shall be responsible for notifying 'MISS UTILITY' prior to construction so that all utilities may be located in the field. If the contractor perceives that a conflict between the utilities and the traffic signal will occur, the contractor shall notify the project engineer immediately so that the conflict may be resolved.
